Laravel Developer (Mid Level)

Mavorion Systems Pvt. Ltd. is seeking a few energetic and talented individuals for the position of Mid-Level Laravel Developers at its Kathmandu office to add to the teams working on several interesting and challenging projects.

Responsibilities

You will be responsible for the implementation of new projects and improvement of existing ones involving the heavy use of PHP, Laravel, VueJS and SQL.

You will be working closely with other developers and team members in a collaborative environment. You will need to demonstrate that you are willing to keep up-to-date with latest technologies relevant to the projects and best practices in software development.

Requirements

- Good command of PHP, Laravel, VueJS and SQL
- Basic understanding of fundamental design principles behind a scalable application
- Good understanding of front-end technologies such as HTML5, CSS3, JavaScript and AJAX
- Have good experience in application development, customization and API development
- Good command of VCS tools like Git, GitHub and GitFlow
- Ability to work with continuous deployment and continuous integration environment
- Capable of meeting tight deadline including the ability to work odd hours
- Quick to learn new skill and use wit and expertise in her/his work
- Creative approach to problem solving
- This is a mid-level position and an experience of 1.5 years or more in the relevant job is required.
- If you do not have the required experience, please look out for beginner positions in the job listings.

Contacts

We’re excited to meet people who not only have the skills—but also the mindset to make a real impact.
Apply today and be part of our mission to power smarter systems for a healthier tomorrow.
